## Overview

### Explore:

- Sanitation.
- Saline Tattoo Removal: Methods & Performance for Every Skin Type.
- Client considerations: skin theory, undertones, Fitzpatrick scale, color and method selection.
- **Healing:** The healing process for different types of skin and age. Aftercare, touch-ups, and preparation.
- **Technical skills:**
  - Practice on synthetic skin while exploring needle types, machine varieties, needle depth, blending methods, and identifying signs of improper technique.
  - Most importantly, learn the correct way to hold and operate the tattoo machine.
- **Prepping for the Procedure**
- **Client Consultation** (Pre-procedure & Aftercare Instructions)
- **Model:** Practice on the invited model under Dasha's supervision. Feel free to bring your own model, or let us find one for you.
- **Graduation:** The student will receive the certificate of course completion.
